HOW TO

add applications by FTP client

add password for the **apps** ftp user name
(note: check if the ftp server **enabled**)

Sites Files Untitled HTML

Site Server Terminal Source Database

Protocol: FTP ☑ Passive mode

Server: 192.168.0.10 21 ✓

User Name: apps

Password: •••••• ☐ Ask each time
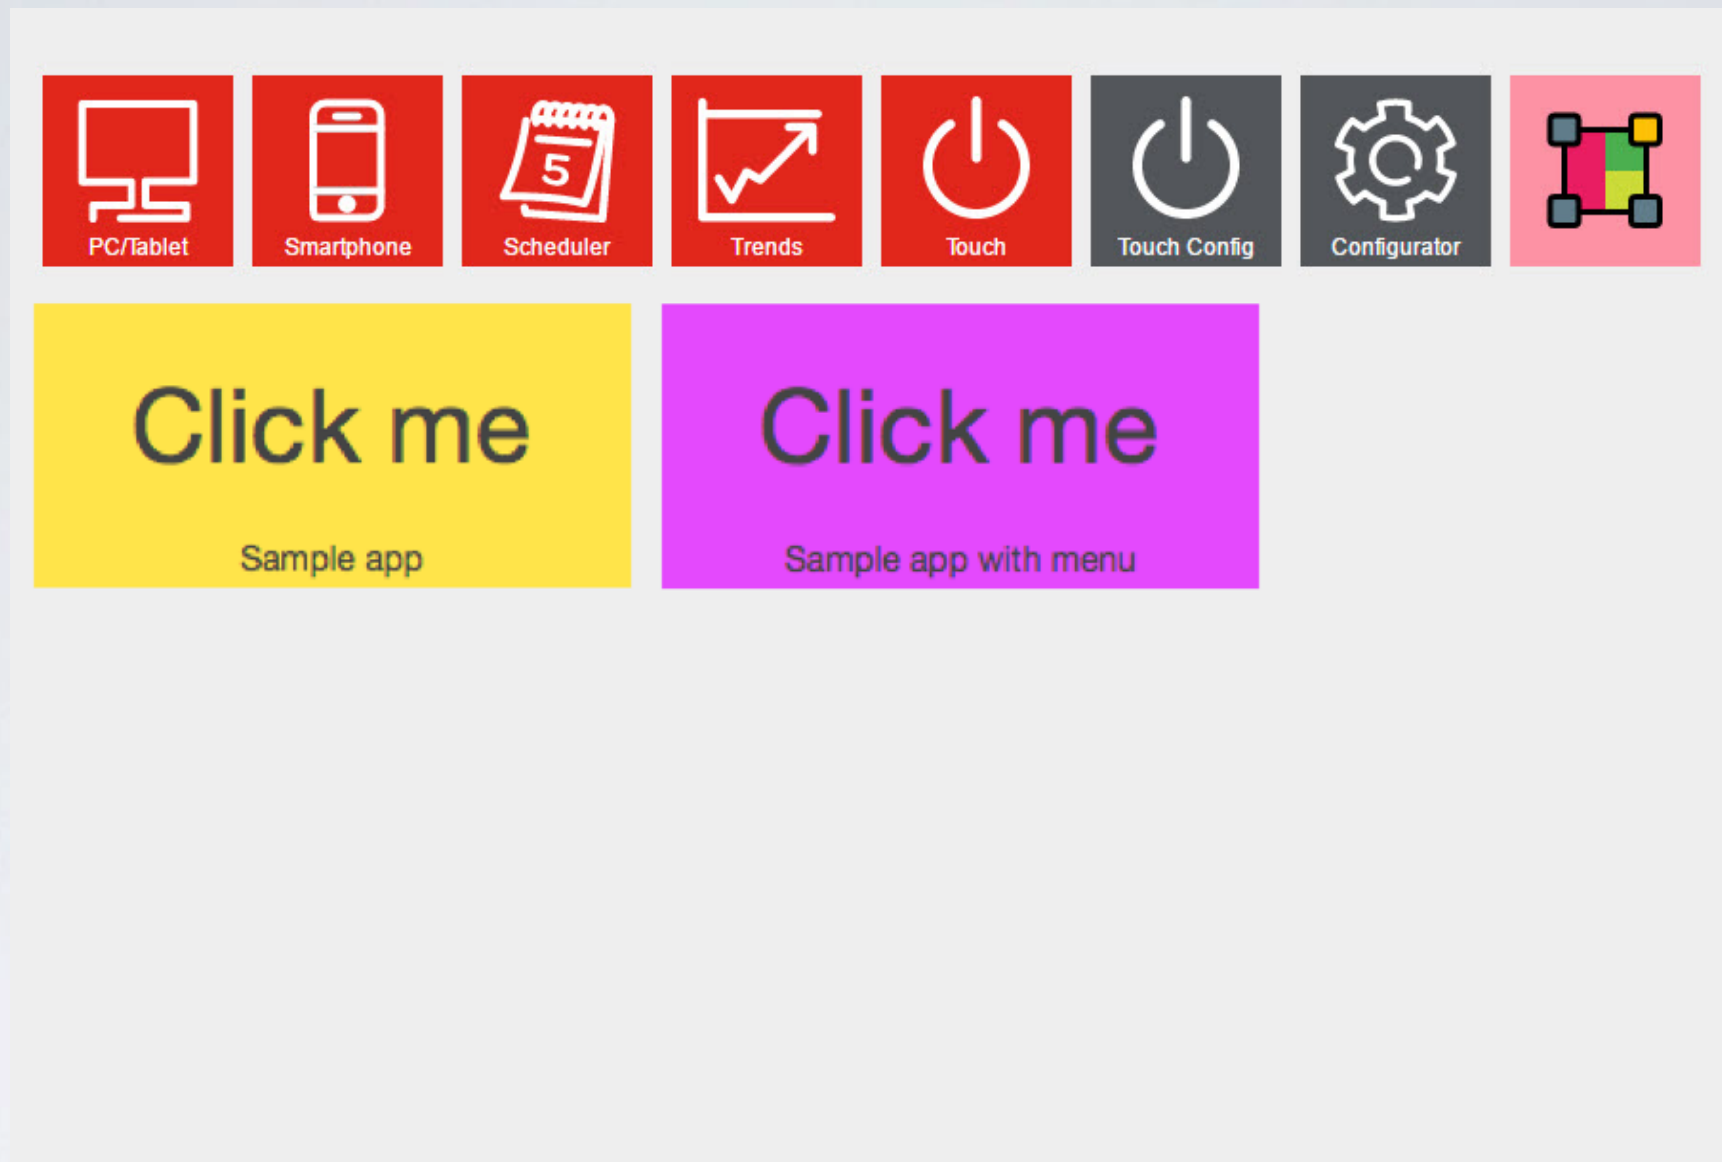

Cancel Save

Create a 'Site' to instantly open your working folders,
restore your tabs, track and publish changes, and more.

go to the **data** folder

copy your application structure to the folder

now your application widget is displayed on the fellerLYnk start page
