

Real Claims, Real Losses

Circuit-Board Maker

A circuit-board maker's testing machine began to malfunction.

Diagnostics indicated that 52 switch cards and the motherboard shorted out and failed.

Total Loss: \$185,800

Electrical Distribution Center

Electrical arcing occurred in an electrical distribution center supplying a clean room. Fumes from overheated wire insulation required that the room be shut down for two months for cleaning and repairs.

Total Loss: \$2,670,000

Hanover Technology Advantage

Why Electronics Manufacturers need Equipment Breakdown coverage.

Electronics manufacturers depend on high-technology production machinery, climate-control systems, electrical distribution systems and boilers. This equipment is subject to sudden and accidental breakdown. A breakdown is not only expensive to repair, but it can also cause business interruption, which can translate to lost revenue and customers.

Protect against loss

Our Equipment Breakdown coverage protects against covered losses caused by:

- Short Circuit
- Electrical Arcing
- Power Surges
- Motor Burnout
- Boiler Damage
- Mechanical Breakdown

Equipment Covered

- Production Machinery
- Building Automation Systems
- Electrical Distribution System
- Heating, Ventilating, and Air Conditioning

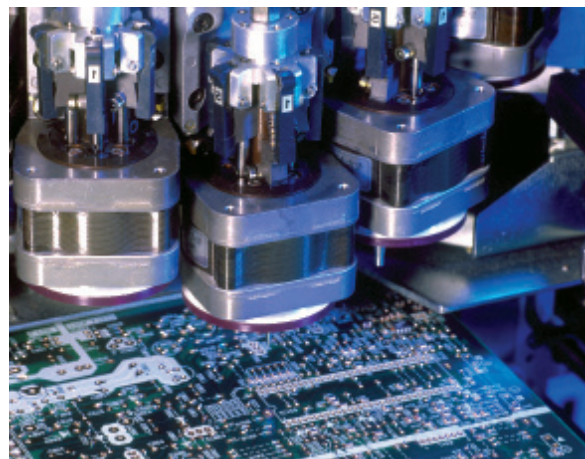

Coverage, plus more

Many states and local governments require boilers and pressure vessels to be inspected periodically by commissioned inspectors. We include

these inspection services so you avoid local fees in many jurisdictions and only pay the certificate fee.
